INTRODUCTION

The Pennsylvania Commission on Crime and Delinquency (PCCD) is pleased to present the 2021 County Adult Probation and Parole Caseload Statistics Report.

Act 114 of 2019 delegated PCCD with analyzing data provided by counties receiving Continuing County Adult Probation and Parole Grant-In-Aid (CCAPPG; formerly known as Grant-In-Aid, or GIA) funding. Counties awarded CCAPPG funding reported various key data elements to PCCD, including actively supervised caseload numbers and corresponding characteristics (e.g. demographics, risk level, etc.).

This report provides a comprehensive overview of the data collected from 65 Pennsylvania counties, and is purposefully constructed to aid in assisting individual counties with comparing their data against four relevant measures: a.) an aggregated statewide total, b.) data from an average county, c.) data from an average county in the individual county's corresponding county class, and d.) data from any other county which could prove informative (e.g. neighboring county, similar-class county, etc.).

As our county stakeholders continue with their efforts of determining the effectiveness of programming/practices which ensure the reasonable and efficient administration of their county adult probation and parole operations, it is our hope that the information contained in this report proves beneficial and helpful.

Please feel free to contact us if we can be of further assistance.

DEFINITIONS

1. **“Accelerated Rehabilitative Disposition”** — indicated as “ARD” on pgs. 14-17 — is a diversionary program, typically used for eligible first-time offenders, whereby offenders participate in rehabilitative programming with the possibility of charge dismissal and expungement of the offender’s arrest record upon program completion.
2. **“Active Offender”** is defined as an offender that is required to report to a county probation and parole department either in person, by telephone, by mail, email, or other means. Such “actively-supervised” offenders comprise a county’s “active caseload” (referenced throughout the report). Active offender does not include those who are in absconder status as a result of a judicial action (for example, a Capias or Bench Warrant has been court ordered for the offender); those pending parole; those who have reached their maximum date of supervision and are only required to pay fines, fees, and/or restitution to the county; or those whose physical supervision has been transferred to another county or another state.
3. **“Intermediate Punishment”** or **“Probation with Restrictive Conditions”** — indicated as “IP/PRC” on pgs. 14-17 — With the passage of Act 115 of 2019, Intermediate Punishment (IP) programs are now incorporated as conditions of a sentence of Probation with Restrictive Conditions (PRC). PRC is a diversionary sentence providing an alternative to incarceration for eligible offenders. A PRC sentence includes a rehabilitative condition and/or a condition that restricts an offender’s movement (e.g. electronic monitoring, house arrest, residential treatment, etc.). PCCD administers approximately \$18 million annually in state funding to counties to support county intermediate punishment operations, such as the delivery of court-mandated treatment programming to nonviolent, substance-dependent offenders.
4. **“Pre-Trial Bail Supervision”** — indicated as “Bail” on pgs. 14-17 — includes anyone who has not received final disposition of their charges but has been ordered to be supervised by the county adult probation and parole department as a condition of bail or other court order.
5. **“Transfer Offender”** — displayed on pgs. 20-21 — is an offender that has been transferred to another county or another state for purposes of physical supervision.

6. **“Risk Score Index”** — displayed on pgs. 18-19 — a statistic calculated by PCCD to standardize a county’s criminogenic risk (the likelihood of engaging in future criminal behavior) profile of their offenders to establish a comparative metric that can be applied across all counties. As part of the CCAPPG funding application, counties submitted their risk/need scores of supervised offenders, as assessed by a risk and needs assessment instrument. At this time, counties use either the Ohio Risk Assessment System (ORAS), the Level of Service Inventory Revised (LSI-R), or another instrument to assess for risk.

Such variation in the use of specific risk instruments across counties, yielded different numerical offender risk scores, proving a challenge to compare scores from one county to the next. However, the instruments share a commonality in that they tend to use the numerical risk scores to more broadly categorize offenders into risk levels. As such, PCCD requested information from counties on the number of offenders assessed for risk that scored into certain risk level categories, and assigned a weighting to them. The risk level categories and assigned weighting is as follows: Low = 1x; Low/Moderate = 1.5x; Moderate = 2x; Moderate/High = 2.5x; High = 3x; Very High = 4x.

The calculation then proceeded by multiplying the number of offenders in each risk level category by the corresponding weighting, summing the scores, and then dividing by the total number of assessed offenders to create the Risk Score Index.

As an example, assume a particular County assessed 200 total offenders, 100 were Low Risk, 70 were Moderate Risk, 20 were High Risk, and 10 were Very High Risk. The formula for calculating the Risk Score Index is as follows:

$$(100 \text{ Low Risk Offenders} \times 1) + (70 \text{ Moderate Risk Offenders} \times 2) + (20 \text{ High Risk Offenders} \times 3) + (10 \text{ Very High Risk Offenders} \times 4) = 340$$

$$340 \div 200 \text{ Total Assessed Offenders} = 1.7 \text{ Risk Score Index}$$

We can conclude that the average offender assessed for risk in this county fell between the risk levels of Low/Moderate (1.5) and Moderate (2.0). When comparing to another county’s Risk Score Index, a lower score would indicate a lessened criminogenic risk profile of assessed offenders (on average), and vice versa if the score is higher.
